

Puppy Loose Stool Procedure

If the puppy is adjusting to a new home, it's normal for the stool to be loose for a period of 3-5 days. If the stool shows at a level 5 or higher on the Puring Fecal Scoring Chart, please follow the steps outlined below:

1. Please try to add 1 tablespoon (TBSP) of canned pumpkin to the puppy's meal. You may also use 1 teaspoon (TSP) of psyllium powder to the puppy's meal.
2. If the stool continues to be loose after adding pumpkin or if diarrhea occurs for more than 24 hours, please contact a member of the Puppy Development Team for next step (s).
